

Marilyn Robertson

Following graduation Marilyn's early working life was spent teaching art. Ten years ago she turned to full-time painting and her career as a professional artist blossomed.

Working to a dramatic colour palette Marilyn produces vivid images in a very distinctive style. Her 'trademark' floral and still life original paintings are valued by art collectors worldwide for their impressionistic life and fluidity, with rose and tulip studies being particular favourites.

Marilyn also creates iconic figurative designs including fashion motifs and an idiosyncratic series of cats with personality - Jasper, Thomas, Sebastian and Leopold are a 'pride' of felines displaying all the arrogance so typical of their kind. Just one look and you know that the "catitudes" (cats with attitude) are without doubt the 'cats that got the cream!'

“When I’m at my easel creating art I count myself very lucky to be doing something I love”

Marilyn has an established reputation as one of the UK's leading contemporary illustrators/artists working across the Greeting Cards, Open Print and Fine Art markets for a range of appreciative clients and licensees.

Her fine art prints and greeting card designs are distributed worldwide. They are also found on a wide variety of stationery, ceramics, textiles and needlecraft products
